***An Evening at the Vintage Tek Museum – A Museum
of Vintage TEKTRONIX Equipment***

Dr. Aris Silzars
Northlight Displays

Wednesday, July 24th - 6:00 P.M.

Tek Museum
4620A SW Beaverton Hillsdale Highway,
Beaverton, OR 97124 USA

Abstract

For this NW SID Chapter meeting we will return to the Vintage Tek Museum in SW Portland. This will be a bit different from our standard fare. In honor of the long history of display and technology innovation at Tektronix -- the golden years of growth and change -- the meeting will consist of some insights and analysis by Aris Silzars. He will bring along samples of some of the innovations that came about and also provide an analysis of the technology and market forces that brought about major changes, followed by a self-guided tour of the museum.

Our hosts will be Ed Sinclair, Stan Griffiths and Bruce Baur. Ed and Stan are the founders of this private museum and former Tek field engineers. Bruce is retired from Tek where he was a Senior Electrical Engineer and current volunteer involved with restoring and maintaining hardware at the museum.

Please check out: <http://www.vintagetek.org/> to get an idea of the great work that has gone into working to preserve the rich history of Tektronix.
